Summary

I am self-taught and passionate about design, and I love creating solutions for complex problems. I want to develop impactful products that make life easier and make existing in this world a little more straightforward.

Experience

Parklane Studios, United Kingdom- Product Designer (January 2025 - Present)

- I worked in a team of 10 to launch multiple products from games to social products and AI products. .
- Designed social features for Timeline, tailoring the existing features to drive growth, leading to tens of thousands of downloads and improving overall UX.
- I ran user research calls with our users to understand pain points and then worked with the product team to prioritise those issues.
- Facilitated seamless hand-off of final designs between design and engineering teams.

Groupify, Nigeria- Associate Product Designer (November 2024 - December 2025))

- I worked in a 7- person team and designed a product that provides a solution for the hassle associated with creating online communities.
- Conducted end-to-end user research and utilized Figma to create UI mockups, translating insights into intuitive design solutions, reducing cognitive load on end users.
- I learned how to work in a design team, use design systems and prototype solutions.

Education

2016- 2021

University of Lagos, Lagos, Nigeria - *BSc, Pure and Applied Chemistry.*

Projects

Cora - AI Receptionist for Small Businesses.

- This product is currently in the development stage
- I worked with a team to design the onboarding of a receptionist product for small businesses that enables them to create AI agents that can answer calls, transcribe calls and save data into their CRMs. .

Timeline - Social network for close friends.

- I worked on the homepage on a social network for close friends that enables them to connect and share more without the noise of algorithmic networks.
- I designed the invite flows, song playing flows, the revamped post UI and the onboarding. .

Wdyt - A game to learn about your friends

- I designed the shop experience for the game, and worked on the revamped profile and settings pages.
